

## India India ITME to host their 11th Edition to be held in Noida from 8-13 December 2022

By Our Staff Reporter

MUMBAI, JULY 13—

India ITME Society has announced its 11th edition of the textile exhibition which will be held at the India Exposition Mart Ltd, Noida, from December 8th to the 13th, 2022.

There will be 15 halls in a total area of 2,35,000 sq mtrs, making it the largest in this industry segment.

This event is expected to host more than 1800 exhibitors in

22 Chapters and is expected to have over 1,50,000 visitors over the 6 days period.

### HIGHLIGHTS OF THE EVENT:

\* Developing India as a textile and textile engineered sourcing destination

\* Encouraging investments in India for textile machinery manufacturing, therein supporting government initiatives to develop India as a 'manufacturing hub' for textile engineering

\* Encouraging new market developments to generate new custom leads from 2nd tier and rural markets for manufacturers

\* Facilitating connect to agents, dealers, distributors for overseas markets as well as the domestic market for the manufacturers

India ITME 2022 will offer unmatched business opportunities to the exhibitors as the Indian textiles industry is set for strong growth, buoyed by vast domestic consumption as well as export demand. It will open windows to various business verticals in the form of leads, contacts and enquiries on a huge-scale massive platform.

Participation from 91 countries and 22 chapters, has made Indian ITME a one stop platform for engineering and technical solutions, technology for the textile industry, servicing the whole of the Indian textile industry and building India brand.

## Eastman & TextileGenesis form partnership for traceability of Naia yarns and fibers

MUMBAI, JULY 13—

With a portfolio that incorporates renewable resources and waste content as feedstocks, Eastman Naia cellulosic yarns and fibers are fully traceable, sustainable solutions for fashion and home textile brands. Now, there's an innovative way to share that traceability information from across the entire supply chain.

Eastman, manufacturer of Naia products — including Naia Renew, a fully sustainable material made with renewable bio-based and molecularly recycled waste — has collaborated with TextileGenesis to use blockchain technology to identify and track the path Naia takes from raw materials to final garment.

Proven traceability helps verify a product's sustainability story. Using advanced digital technologies and supply chain modeling, TextileGenesis traces every phase of garment making, citing farm and factory locations and every process used to get a product from point of origin to final retail destination.

### Here's how it works.

The pioneering TextileGenesis system engages all tiers of a supplier's ecosystem to create unprecedented traceability based on five key principles:

1. Verifying the point of origin by digitizing any textile asset (e.g., fiber, filament, yarn, fabric, garment) to ensure there is no double counting
2. Capturing real-time shipment transactions across supply tiers
3. Value chain modeling, using augmented intelligence to gain insight on complex textile value chains along with wastage and loss factors
4. Creating a cross-industry ecosystem by working with organizations, exchanges, established protocols, and sustainable fiber producers — applying premier environmental, social and governance (ESG) standards
5. Supporting independent, third-party verification, including by those that perform forensic fiber audits and verify the ESG credentials of suppliers

"Traceability in the textiles supply chain is a crucial step for

## India's trade with Sri Lanka 'at standstill'

NEW DELHI, JULY 13—

India's trade with Sri Lanka has nearly stopped following the unrest in the island nation, leaving exporters worried about their payments.

At present, goods which are under SBI and Exim Bank's line of credit are being exported to that country and they include key raw materials for textiles industry among other industries, it may be noted here

"Our exports and imports have come to a complete standstill. Exporters are very cautious because of the political crisis and payment issues," Federation of Indian Export Organisations (FIEO) Vice-Chairman Khalid Khan said.

However, he expressed hope that once the new

## India's textile, handicraft exports at record \$44 bn in FY22: Textile Secy

NEW DELHI, JULY 13—

India exported textiles and handicrafts worth more than USD 44 billion -- an all-time high -- last financial year, Textiles Secretary UPSingh said on Tuesday.

He was speaking at an industry event in Greater Noida which was inaugurated by Union Minister of State for Textiles and Railways Darshana Vikram Jardosh.

Jardosh, while inaugurating the 11th edition of HGH India 2022, said the country is celebrating its 75th year of Independence and it is the best time to showcase made-in-India products.

Textiles Secretary Singh

said the demand for textiles in the domestic and overseas market is high.

"In India, whenever we talk of textiles, we always go by the export figures. It's a matter of satisfaction that last financial year, India exported more than USD 44 billion worth of textiles and handicrafts, which is an all-time record," a statement quoted Singh as saying.

"Especially after pandemic, one sector under textile which has really got a boost has been home textile. The government has also launched 7 mega textile parks that would take care of the high logistics cost as well as the fragmented value chain which we have," he

added.  
Most of the major exporting destinations like the US and EU are all going for a 'China plus one' strategy, which will prove to be beneficial for India since the cost of labour is low as compared to the neighbouring country, he said.

For all your requirement in Specialty Fibres, Tops and Filaments Yarn for Worsted / Cotton Spinning in all Lusters from Japan, Korea, Taiwan & South East, Europe and USA.

# Première Vision brings together over 23K visitors for a strong edition and confirms a change of calendar highly anticipated by the fashion industry

From Tecoya NewsDesk

**MUMBAI, JULY 13—**

From July 4 to 8, Première Vision Paris presented its first edition dedicated to the Fall-Winter 2023-24 collections: a physical show at the Parc des Expositions, Paris Nord Villepinte (July 5-7), complemented by a digital show accessible online (July 4-8).

Historically held in September, Première Vision Paris continues to build on its success with its new summer positioning. Designed to better cater to the evolving cycles of the fashion industry, as well as to the needs of manufacturers, this calendar change has won the market's approval. A 32% growth in the creative offer (vs. September 2021), the return of international visitors, and the industry's reinforced commitment to eco responsibility issues addressed by Première Vision all confirm the event's strategic choices.

The physical edition, which attracted 23,377 visitors (+37% vs. September 2021 and +10% vs. February 2022), underlines the positive momentum of the event, with a solid turnout, especially on its first day, despite rail and air strikes, and despite a call for telecommuting issued by the SNCF (France's national railway) to its users.

"We are pleased to have finally been able to respond to market demand with a new agenda that has been brought forward by two months. The creativity of our offer, the energy of our visitors, the return of distant markets, the challenge of eco-responsibility, and the success of the new services we offer are all strong and encouraging signs that we are able to sustain our activity despite the current context," confirms Gilles Lasbordes, General Manager of Première Vision.

**Growing Visitor Numbers**

With international attendance at 69%, and a notable return of the United States and Korea, respectively in the Top 10 and Top 15 positions, international buyers turned out to discover the ultra-

premium collections of 1,200 exhibitors. This growing creative offer (+32% vs. September 2021 and +10% vs. February 2022) also had a strong international dimension, with exhibitors coming mostly from Europe—with Italy in the lead, followed by France, the United Kingdom, Spain, Portugal, and Germany...—as well as from the Mediterranean basin—Turkey, Morocco, Tunisia...—and from Asia—Japan, Korea, India...

In a context where, in addition to the still latent health crisis, we now face an unstable international situation related to the war in Ukraine, which affects all markets in terms of business and industrial factors (rising raw material prices, supply difficulties, logistics, etc.), this growth both in attendance and offer around a brand new calendar reflects the fashion industry's solid confidence in the Première Vision Paris show.

**Eco-Responsibility at the Heart of Our Concerns**

At a time when 90.5% of consumers intend to change the way they buy clothing in the coming years to better integrate eco-responsibility criteria\*, Première Vision continues to support the sector's players in their environmental and social transition through a complete system that has once again been expanded: The Smart Creation space, the Eco-Innovation Forum, the Trend Tasting Eco-Innovation seminar, conferences dedicated to the challenges of eco-responsible fashion, the Eco-Entrance educational space (Hall 4 entrance), educational content.

# Eastman & TextileGenesis form partnership for traceability

Continued from Page 1 Col 6

a more transparent industry overall," said Claudia de Witte, sustainability leader, Eastman Textile Fibers. "Joining the TextileGenesis platform is an exciting addition to our existing Naia verification program. By collaborating with fellow innovators, we are delivering on our 2022 sustainability goal to enable advanced technology and information solutions for tracking and tracing our materials."

According to de Witte, the TextileGenesis partnership demonstrates Eastman's commitment to partner with industry leaders to implement systematic changes that help ensure that sustainable textiles are accessible to all.

"Traceability is fast becoming a key prerequisite to sustainable product offerings," said Amit Gautam, TextileGenius CEO and founder. "Our partnership with Eastman will create unprecedented supply chain traceability for Naia fibers and filament towards retail brands. It moves forward the sustainable fibers industry to create end-to-end traceability."

Empowering consumers to make ethical choices

Made with the vision to inspire more eco-friendly fashion and home textiles, Naia cellulosic yarns and fiber are responsibly sourced from sustainably managed pine and eucalyptus forests to ensure no deforestation of ancient and endangered forests. For further sustainability, Naia Renew gives brands the opportunity to offer circularity at scale. Produced from 60% sustainably sourced and traceable wood pulp and 40% certified\* recycled waste materials, Naia Renew creates new value from hard-to-recycle materials that would otherwise be destined for landfills, incinerators, or other undesirable end-of-life destinations.

According to de Witte, "Understanding where materials come from is a vital part of a brand's sustainability story. By working with TextileGenesis, we're giving our brand partners a Naia travel log from factory floors to retailers' doors, complete with snapshots that detail its journey across the value chain. And in the end, this gives consumers the information they need to make ethical decisions about their fashion."

## Rupee drops by 22 paise to record low of 79.81 against US dollar

MUMBAI, JULY 13—

The rupee declined by 22 paise to close at a record low of 79.81 against the US currency on Wednesday after the dollar surged to a 20-year high in overseas markets and foreign investors continued to withdraw funds from Indian stocks.

Fears of aggressive interest rate hikes by central banks to rein in surging inflation weighed on the local unit, forex dealers said. Crude oil prices trading near USD 100 per barrel level, however, supported the rupee, they added.

At the interbank forex market, the local unit opened strong at 79.55 against the greenback and later touched a high of 79.53 amid early gains in stock markets.

The rupee slid in the latter half due to a stronger dollar and closed at the day's low of 79.81, down by 22 paise over the previous close of 79.59, which was all-time closing low.

The dollar index, which measures the greenback's strength against a basket of six currencies, advanced to a 20-year high of 108.59.

Retail inflation in the US surged to a four-decade high of 9.1 per cent in June, which analysts said would put pressure on the Federal Reserve to bring it down with aggressive interest rate hikes.

Benchmark 10-year US bond yields rose above the 3 per cent mark while two-year note yields raced to a three-week high after the inflation date.

High US bond yields make emerging market currencies like the rupee less appealing to investors, leading to capital outflows.

## India's trade with Sri Lanka 'at standstill'

Continued from Page 1 Col 3

government takes office in Sri Lanka, situation may improve.

Sri Lanka, a country of 22 million people, is facing an unprecedented economic turmoil, the worst in seven decades, leaving millions struggling to buy food, medicines, fuel and other essentials. The grim situation has resulted in a civil unrest.

The country, with an acute foreign currency crisis that resulted in foreign debt default, had announced in April that it is suspending nearly USD 7 billion foreign debt repayment due for this year out of about USD 25 billion due through 2026. Sri Lanka's total foreign debt stands at USD 51 billion.

FIEO Director General Ajay Sahai said political stability will help in resumption of trade.

In 2021-22, export of goods from India was worth USD 5.8 billion, while it was USD 550 million in April this year. In last

fiscal year, import stood at USD 1 billion. It was USD 74.68 million in April 2022.

A free trade agreement between India and Sri Lanka came into effect in 2000.

In addition to being one of the largest trade partners of Sri Lanka, India is also one of the largest contributors to foreign direct investment into that country.

Mumbai-based exporter and Chairman of Technocraft Industries, Sharad Kumar Saraf said not only exporters, businesses who have invested there are also "very" worried about the current turmoil there.

The main investments from India are in the areas of petroleum retail, tourism & hotel, manufacturing, real estate, telecommunication, banking and financial services.

"Trade has come down drastically. Exporters are worried about their payments. My business with Sri Lanka has

dipped to 25 per cent since January," Saraf added.

Sharing similar views, Chairman of Farida Group Rafeeq Ahmed said trade has virtually stopped due to the ongoing crisis in Sri Lanka.

"Exporters are confused. At the moment, nobody wants to engage with that country," he added.

Rajesh Menon, DG, SIAM (Society of Indian Automobile Manufacturers) said Sri Lanka is a key market for the domestic auto industry and "we hope that the economic situation improves in that country at the earliest, enabling reinstatement of the Indian automobile exports".

India's exports to Sri Lanka include engineering goods, chemicals, iron and steel, agri commodities, mineral fuel, pharma products, plastic goods, and paper items. Imports include agri produce, textile goods, boats, fruits and nuts.

# New Australian govt supports trade pact with India: Goyal

NEW DELHI, JULY 13-(PTI)

The new Australian government supports the trade pact signed with India, and they are expected to soon approach their parliament for approval of the agreement, Commerce and Industry Minister Piyush Goyal has said.

India-Australia Economic Cooperation and Trade Agreement (ECTA) signed in April needs ratification by Australian parliament before its implementation.

"I met minister Mr Don Farrell, who looks after trade in the new (Australian) government, and he has confirmed that they will be taking the Indus-ECTA to parliament very soon and they support the agreement and would like to further expand their engagement with India in the months and years to come," Goyal told PTI.

The agreement, once implemented, will provide duty-free access to the Australian market for over 6,000 broad sectors of India, including textiles, leather, furniture, jewellery and machinery.

Goyal had earlier said that the agreement would help in taking bilateral trade from USD 27.5 billion at present to USD 45-50 billion in the next five years.

Under the pact, Australia is offering zero-duty access to India for about 96.4 per cent of exports (by value) from day one. This covers many products that currently attract 4-5 per cent customs duty in Australia.

Labour-intensive sectors, which would gain immensely include textiles and apparel, few agricultural and fish products, leather, footwear, furniture, sports goods, jewellery, machinery, electrical goods and railway wagons.

Australia is the 17th largest trading partner of India, while New Delhi is Canberra's 9th largest partner. India's goods exports were worth USD 6.9 billion and imports aggregated to USD 15.1 billion in 2021.

# US inflation reached a new 40-year high in June of 9.1%

WASHINGTON, JUL 13 (AP)

Surging prices for gas, food and rent catapulted US inflation to a new four-decade peak in June, further pressuring households and likely sealing the case for another large interest rate hike by the Federal Reserve, with higher borrowing costs to follow.

Consumer prices soared 9.1 per cent compared with a year earlier, the government said Wednesday, the biggest yearly increase since 1981, and up from

an 8.6 per cent jump in May. On a monthly basis, prices rose 1.3 per cent from May to June,

another substantial increase, after prices had jumped 1 per cent from April to May.

The ongoing price increases underscore the brutal impact that inflation has inflicted on many families, with the costs of necessities, in particular, rising much faster than average incomes. Lower-income and Black and Hispanic Americans have been hit especially hard, because a disproportionate share

of their income goes toward such essentials as housing, transportation and food.

Some economists have held out hope that inflation might be reaching or nearing a short-term peak. Gas prices, for example, have fallen from the eye-watering USD 5 a gallon reached in mid-June to an average of USD 4.63 nationwide Wednesday still far higher than a year ago but a drop that could help slow inflation for July and possibly August.

In addition, shipping costs

and commodity prices have begun to fall. Pay increases have slowed. And surveys show that Americans' expectations for inflation over the long run have eased a trend that often points to more moderate price increases over time.

Still, the breadth of the price gains shows how rising costs have seeped into nearly every corner of the economy. Grocery prices have jumped 12.2 per cent compared with a year ago, the steepest such climb since 1979.
